

DEATH AT WELDON.

Mrs. Elizabeth Benham, of Weldon, died last Wednesday at the age of 76. She was a Miss Wright. Mrs. Benham was born in Hardin county in 1830. In 1867 Mrs. Benham united with the Baptist church at Rock Ridge and afterwards moved her membership to Brandenburg, where she was a member until the time of her death. She lived a faithful Christian life.

Mrs. Benham was married to Mr. J. G. Benham in 1854 and to this union were born nine children.

DEATH AT PERSIMMON FLAT.

Mrs. Alvin Mattingly, age 77 of Persimmon Flat, died Sunday of senility. She leaves three children and a husband. She was a member of the Catholic church at Hardinsburg. The funeral services were held by Father Gabe Monday and the interment was made at the Hardinsburg Catholic grave yard.

DIES AT CLOVER CREEK.

Lafayette Miller, of Clover Creek neighborhood died last Friday of pneumonia. He was 56 years old. In 1870 he married Miss Neal Tate. To this union were born ten children, two died in infancy and a daughter at 17 years of age. In 1887 Mr. Miller joined the Clover Creek church and was a faithful member until his death. Mr. Miller expressed a readiness to die but wanted to live.

MR. MOORMAN IMPROVING.

Hon. D. C. Moorman, of Glendens, who suffered a very painful cut in the face two weeks ago, is improving. The wound was caused by falling on a twenty penny nail. A four inch gash was cut under the left eye, running down four inches below the jaw bone.

CAPLE--WITT.

Ekron, Ky., May 1--Mr. Caple, of Ekron, Kentucky, and Miss Witt were very quietly married Thursday at 3 p. m. at the home of the bride, Mrs. R. Witt. Rev. Jim Willette officiating. Only near relatives and intimate friends were present. Immediately after the ceremony Mr. and Mrs. Caple left for their home at Louisville.

SUFFER LOSS AT FRISCO.

Mr. J. E. Keith, of this city, is in receipt of a letter from Ben F. Burch, a relative of his, and night editor of the St. Louis Globe-Democrat. Mr. Burch was formerly of Maude county. His father with his family moved to California many years ago and is a prominent business man of San Francisco.

Mr. Burch said in the letter that the folks family was safe but had sustained by the loss of their home, office and their contents. Willis, a brother of Mr. Burch, lost many thousands of dollars worth of architectural works in his office and a beautiful new home in San Francisco.

Not as Rich as Rockefeller. If you had all the wealth of Rockefeller, the Standard Oil magnate, you could not buy a better medicine for sore complaints than Chamberlain's Colic, Cholera and Diarrhoea Remedy, the most eminent physician can not prescribe a better preparation for colic and diarrhoea, both for children and adults. The uniform success of this remedy has shown it to be superior to others. It never fails, and when mixed with water and sweetened, is pleasant to take. Every family should be supplied with it. Sold by Short & Laynes.

Mrs. Jno. D. Babbage and daughter, Misses Louise and Mildred, have returned from a visit to relatives in Louisville.

Judge Henry Moorman was in town at Hardinsburg Sunday.

HONOR FOR C. B. SKILLMAN.

Gov. Beckham has appointed Mr. C. B. Skillman of this place, county commissioner to officially represent Breckenridge county for the Kentucky session during House-Opening week in Louisville.

Mr. Skillman has appointed Judge Henry DeHaven Moorman vice-commissioner.

Miss Ruth Haynes has been selected most of her. She is one of Cloverport's most cultured girls and will do her duties with ease and gracefulness. The hostess has not yet been selected.

Mr. Skillman is one of the county's most popular men and will make Breckenridge a very fine representative at this event. He has a congenial manner about him that is to be admired and which will lead much to his success as Breckenridge's representative at Louisville in June.

JOE FALLON PROMOTED.

Joe Fallon, the local telegraph operator for the Henderson Route, has been promoted and given a place as station agent at Maclora, a new station on the Extension, 15 miles from Louisville. Mr. Fallon took charge the first of May. He is a young man of merit and a hard worker. He is very popular here, this being his home town. His services at the local depot, though covering but a few months, have lessened the patrons of the route. Joe always showing the nicest courtesies even in rush hours.

The vacancy created by Fallon will be filled by Mr. Vivian Pierce of this city, now in the service of the company at Louisville in the General Office. Young Pierce, while not out of his teens has proven himself a good employee. He has made good wherever Henderson Route has put him and the accepting of the position made vacant by Mr. Fallon means a promotion for Mr. Pierce over any place he has yet held with the Henderson Route. Pierce is located in an office here at the local depot.

Horvies Behen who is the Agent at this place and under whom Mr. Pierce will work is another of Cloverport's self-made young men. Behen starting in as office boy here, learning telegraphy and serving his trade good points on the road came back to Cloverport and has served the company faithfully as telegraph operator and now as Agent. Mr. Behen filled the vacancy created by the resignation of Mr. Fred Ferry a few months ago. The success of the boys who start under Mr. Ferry reflects credit upon him as being a man who knows.

From Mr. Paul. The News is in receipt of the following letter from Mr. Paul, of Clinton Mo., who was formerly of Breckenridge and is a son of Mr. J. E. Paul of Lewisville. The News is glad to learn through an exchange sent that Mr. Paul is doing well in Clinton, having been elected a councilman. He is doing a good business there and faring well, all of which he deserves.

Clinton, Mo., April 26, Mr. Jno. D. Babbage, Editor News--I see from the News that Selby McCracken is a councilman in your town. I knew Selby when he was a small boy and am glad to see him doing so well. I am pleased to the well-doing of Breckenridge county people. I am sorry to learn of Golden Rod's death. She was my teacher when I was a very small boy.

Yours truly, Geo. P. Paul.

Mrs. J. L. Long, Miss Nellie Paul and Miss Amanda Long, of Addison, were in the city Saturday.

Mrs. Fannie Hemstet, of Leitchfield, Ky. J. E. Keith of this city, and Mr. George Keith, of Evansville, Ind. with their sister, Mrs. Jennie Cain, at Brandenburg Sunday April 21, this being the first time the family has broken bread together in thirty years. The brothers and sisters with the exception of Mr. J. E. Keith visited the old homestead at Garrettsville, Maude county before they returned to their respective homes.

KINGSWOOD COLLEGE.

Harned, Ky., May 1 1906--I want to say to my friends many of whom have written me in the last few weeks concerning my future work. I have been constantly occupied since my arrival here about the middle of Jan. I have cleared a considerable amount of land, have more than a thousand sawlogs cut, have done a considerable amount of farming, have one hundred and eighty acres of land for corn most of it broken; thirty-five acres in oats; one hundred acres in wheat and am planning for a large garden, under the blessings of God I hope to raise enough to feed my school and some to spare. I have a large force at work, some sawing lumber, some getting out stone, and I will begin my buildings at once. I have a great deal of work ahead of me, but by the help of God I expect to be ready for our commencing Aug. 1, 31 and open school the last day of camp meeting, with as strong a faculty as I ever had, consisting of fourteen teachers and officers. Through the kindly providence of God I have secured most of my teachers, still have three vacancies, which I hope to fill in a short time. Those who have known of my school work in the past may be assured it will be as strong, on educational and religious lines, as it has ever been. Our plan in the future will be designated as follows: "Kingswood college" on "Kingswood farm" in edge of "Kingswood" (prospective town). We expect to have good comfortable buildings completed by the opening of school, you will see cuts of them in my prospective catalog.

Farm consists of 944 acres, 150 acres of land, joining the college farm has been purchased by another gentleman and myself for the site of our new town. It is now being surveyed and land off in lots which will be sold at reasonable prices. Quite a number of applications for lots have been received. No doubt many a full Salvation school in a full Salvation school, will want a lot in our new town. Building material is very reasonable. This is a good farming country, land can be bought at very low rates, giving a splendid opportunity to those who want to lay out a full Salvation school. Here the price of land will be continually increased. I can work a number of young men during the summer who want to be in school next year, would prefer mechanics of some kind. I will need many, will pay good wages. This section of country is greatly interested in our enterprise and assure me a good patronage for our opening. While I have made but one notice in the papers I have received many letters from prospective pupils, and the outlook at home and abroad is excellent. Do not hesitate to say that my fifteen years of work will enable me to begin, at once, where I left off, and any young man or woman who comes to us will get as good training as they ever got in any former school, which many know and esteem favorably with our former class colleges. My circulars and catalog will be out soon, writers for them for general information. The following courses of study will be taught: Classical, Scientific, Theological, Music, and Business.

"I do not know I state the truth when I say I am happy in my work, and feel more sure than ever that God led us here, and He is opening up the work on all lines, for which we are profoundly grateful. We covet an interest in the prayers of our friends.

-Yours in Him J. W. Hughes.

Sciatica Cured After Twenty Years of Torture.

For more than twenty years Mr. J. B. Massey, of 3923 Clinton St., Minneapolis, Minn., was tortured by sciatica. The pain and suffering which he endured during this time is beyond comprehension. Nothing gave him any permanent relief until he used Chamberlain's Pain Balm. One application of that liniment relieved the pain and made sleep rest possible, and less than one bottle has effected a permanent cure. He is troubled with sciatica or rheumatism why not try a 25 cent bottle of Pain Balm and see for yourself how quickly it relieves the pain. For sale by Short & Haynes.

Miss Eva Wine has been assisting Miss Lillian Sippel in her store for several days.

Mr. and Mrs. P. E. Scott and children of Harned have moved here and are occupying the residence on the Hill vacated by the Board family.

DRAGGED TO DEATH.

One of the most horrible deaths that has occurred in this county for many years was that of little 16-year-old Bonnet Lilla, nephew of Wm. Cunningham, of Stephensport, on last Thursday about 5 p. m.

Young Lilla was out in the field about a half-mile from the barn and when evening came it is supposed he was releasing the horses from the plow and while doing this was caught in the traces and could not free himself.

The horses became frightened and ran, dragging the boy a half-mile over the rough field to the barn, thus killing him. His twelve-year-old sister, who was at the house, which is not far from the barn, saw the horses coming and started to the barn to open the door for them, thinking that her brother had turned the horses loose. As the horses drew near she saw the tattered, bruised body of her brother hanging to the traces about the animals. The boy's face was cut up badly and his nose split open. His neck, right arm and right leg were broken. One foot was tied up in the trace and by this he was dragged to the barn.

The boy was a bright young lad and well liked. Both he and his sister were orphans.

PROGRAM

Maude County S. S. Convention at Ekron, May 3--An All Day Meeting.

The Maude County Sunday School Convention will meet at Ekron May 3 with an all day meeting. At night Mr. E. A. Fox will give a stereoscopic lecture on his trip to the Holy Land. On the night of May 2 Rev. C. Green will conduct a convention at Clinton. Below is the program in full for the Ekron convention.

9:45 Devotional--Rev. Dan Shacklett. 10: The Meaning and Purpose of this Convention. 10:15 The Teacher and his work--County President, Frank Kennedy. 10:30 The S. S. as an Educational Institution--Miss Booth. 10:50 How to make the S. S. Go--Rev. Green. 10:55 The S. S. Place and Power--Jas. Shacklett. 11:40 Teachers Training Conference led by E. A. Fox. 1:10 Report of County Sup't. W. D. Ashcraft. 2: How to Organize and maintain classes--E. A. Fox. 3: Sample Training Lesson--Rev. C. C. Green. 3:15 Union Intermission.

AFTERNOON SESSION.

1:45 Song and prayer. Report of Sup't. Home Dept.--Mrs. H. L. Bell. 2:10 Report County Secretary. Showing on map: 1. Number and location of S. S. 2. Last year. 3. Children of school age. 4. Population. 5. Church Membership. 6. Churches without schools. 7. 230 Factors of night of above conditions. C. Green.

1. Teachers' meetings. 2. Grading. 3. Library. 4. Organized classes. 5. Messenger Service. 6. Recitation. 7. I. B. R. A. 8. Lesson Preparation. 9. The Records. 10. The Finances. 11. The Wiggling Boy and the Giggling Girl. 12. The S. S. and Missions. 13. The S. S. and Temperance. 14. The Problem of the Parents. 15. Miscellaneous. 4:30 Announcements--Adjournment. J. M. Herndon, County President.

The Henderson Route Pay car was here last week.

Miss Flora Hardin, was down from Holt last week visiting relatives. Miss Hardin has just returned from a lengthy visit to Louisville.

MEMORIAL RESOLUTIONS.

Hardinsburg, Ky., May 2--The M. E. church, Sunday School adopted the following resolutions. Sunday, in regard to the death of Mrs. M. A. Bowmer, our Heavenly Father, in his divine wisdom, has called from this life to the home of the Blessed, Mrs. M. A. Bowmer, our fellow worker in Church and Sunday school, who has long labored faithfully and well, and whose trust has resulted in much and lasting good to the church, the school and the community. Therefore, Be it Resolved, That we, as a Sunday School, express our great and sincere sorrow and grief at her death, which has removed from our midst, a faithful church worker, a conscientious and well-equipped teacher in the school and a true and consistent Christian, who witnessed by the beautiful life in all its various relations, that she closely followed the teachings of the great Ruler.

2nd. That we tender to the aged mother, the children and other relatives of the deceased, our sincere and heart felt sympathy and condolence in their great loss and bereavement.

3rd. That these resolutions be spread upon the records of this Sunday School, that the Secretary present a copy to the family, and that the two county papers be requested to publish them.

Morris Eckridge, Mrs. Clara Beard, William Beard, Mrs. Leticia Haswell, Mrs. P. Haswell, Jr., Committee.

Gross receipts were \$80.

In a few days the building will show few outward signs of the fire.

Colonel Frank Maus of the Twenty-third United States Infantry who has charge of the Third military district of the city, with headquarters at Portsmouth square, is authority for the statement that looting has commenced in the Chinatown district and in the ruins of pawnshops along Kearney street.

The area destroyed in San Francisco approximate 10,000 acres, or about fifteen square miles. The aggregate number of dead probably will not exceed 700 and will certainly not reach 1,000. Notwithstanding the enormous and widespread destruction the homes of 150,000 people are still standing. There still remain the great ship yards, Pacific Mail docks, the stock yards at South San Francisco, and the docks and manufacturing plants along the water front from Mission Creek to Hunter's Point, the mint, the postoffice and the retail district on Van Ness and Market streets.

Coroner William Walsh estimated that the total number of dead will not be less than 1,000. His estimate is made up from all the data he has been able to collect. General Greely officially lists the number of dead in San Francisco to 277.

Federal Troops Fed People.

San Francisco, April 26--The United States army now has full charge of the gigantic task of issuing food. This resulted from a meeting of the executive committee. With this most important duty delegated to the army, the district commander, General Greely, turned their attention to the resumption of business. The municipal government has established a scale of prices for important commodities, food, clothing and fuel. There are few streets that existing under normal conditions. Warning was given dealers that any effort to charge exorbitant prices would result in action by the authorities. Streets are promised for today and electric lights will be turned on in the evening. In front of every house there is a small improvised furnace or cookstove whereon the food is prepared.

Why Stanford University Fell.

Palo Alto, Calif., April 28--No attempt is being made to begin the work of repair and reconstruction necessary to restore the university buildings torn down by the earthquake. Cheap workmanship and defective construction are attributed as the sole causes for the absolute overthrow of the larger university buildings. The work of rebuilding the town of Palo Alto is well under way. Many university students are stranded without means to get home. The university has no ready money and can not advance it for transportation, but the railroad company is attempting to relieve the situation. Despite their own hard condition the students are helping greatly toward the San Francisco relief work.

Egworth League Day will be observed at the M. E. church next Sunday night by the local chapter. The church services have given away to the event and a special program will be carried out. All are invited.

Mrs. L. D. Bishop and baby have been the guest of Mr. and Mrs. Sam Bishop.

SUCCESSFUL PRODUCTION.

"The Moonshiner's Daughter" a tragic comedy drama was played in Olee's hall last Thursday evening by the Glover Dramatic Club of the local A. O. U. W. lodge. The play was successfully played by the local talent who were the recipients of many congratulations. The cast was made up of W. R. Wilson, William McCracken, Emmet Mattingly, Thomas Wins, Jess Boner and Misses Nina Wilkerson, Josie Berry and Esther Jackson. The three young ladies looked beautiful behind the foot-lights and did their parts up all right. The young men, in the two first acts, set themselves off to a fine advantage in their Moonsniner's costumes and in the third act, being dressed as rich New Yorkers, looked very well.

There were no apparent bad breaks in the entire production. Each character was familiar with his lines and acted them with ease.

Music was rendered by local talent, Lillian Smith, violin, Tom Morrison, guitar and Edward Harris, bass violin. Young Smith is as good an artist with the violin as he is with the brush.

Gross receipts were \$80.

In a few days the building will show few outward signs of the fire.

ST. LOUIS LIVE STOCK MARKET

Reported By Evans-Snyder-Buel Co.
Live Stock Commission Agent

Special to the News National Stock Yards, Ill., Apr. 25th. Beef cattle show no recovery from the decline noted at the close of last week and although the rain is light, sales are hard to make at prices fully a quarter lower than a week ago. Good to choice steers are selling \$4.75 to \$5.50, medium to good \$4.25 to \$4.75, common to medium \$3.50 to \$4.25, fair to good fat yearlings \$4.25 to \$5.00. There was a little show of strength in the butcher cattle trade as compared with the close of last week and bulk of sales were made on following basis: Choice to fancy beefers \$4.50 to \$4.90, good to choice \$4.25 to \$4.65, medium to good \$3.25 to \$4.25, common kinds \$2.75 to \$3.25. Fancy good \$4.00 to \$4.50 medium to good \$3.50 to \$4.00, fair to medium \$3.00 to \$3.50, cutters \$2.50 to \$3.00, canners \$1.50 to \$2.00. Choice fat hogs \$5.00 to \$5.25, good to choice \$4.25 to \$4.65, sausage bulk \$2.50 to \$3.00, choice value \$5.00 to \$5.50 common \$4.00 to \$4.75. Practically nothing doing in the stocker and feeder trade. Good two choice milch cows \$4.00 to \$5.00.

Hogs 15 to 20 lower for the week. Light mixed grades \$3.20 to \$3.60. Sheep steady receipts light. Spring lambs around \$8.50 fat sheep \$5.75 to \$5.90.

Evans-Snyder-Buel Co.

It Is Dangerous to Neglect a Cold.
How often do we hear it remarked, "It's only a cold," and a few days later learn that the man is on his back with pneumonia. This is such common occurrence that a cold, however slight, should not be disregarded. Chamberlain's Cough Remedy counteracts any tendency of a cold to result in pneumonia, and has gained its great popularity and extensive sale by its prompt cures of this most common ailment. It always cures and is pleasant to take. For sale by Short & Haynes.

DIES IN CHICAGO.

The death of Mrs. James C. Simms, (nee Miss Brook Stephens) which occurred in Chicago Friday evening (March 30), was a great loss to her many friends and relatives. Mrs. Simms was the youngest daughter of the late James G. Stephens of Breckenridge county, Ky. She leaves a devoted husband and one child, a widowed mother and two sisters, Mrs. J. J. Minary and Mrs. J. J. Minary, both of Louisville, and an only brother, Minor Stephens, of Lakeland, Fla., to mourn her early loss.

She has gone from us as if inhaled to heaven. Grief fills our hearts; a shadow rests upon the household of where she has departed to swell the angelic choir that summons the throne of her Father in heaven.

Only a few days ago I was in this home. It was a joy and a privilege to talk to Mrs. Simms. She was a child of the Christian faith brought up in a Christian home by a loved father and mother by her own choice a disciple of Jesus. Her was a gracious and an attractive personality. And her friends loved and admired her because of her beautiful character. But death comes late in the journey and she comes here and has changed this little family circle with the sweet

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depending upon it, the cause, the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. Kidney trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is now realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a booklet by mail, also pamphlet telling of all it includes, many of the best testimonials of those who have suffered cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

Don't make any mistake but remember the name, Swamp-Root. Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., in every bottle.

Doctor Bringham Says

MANY PHYSICIANS PRESCRIBE

Lydia E. Pinkham's Vegetable Compound

The wonderful power of Lydia E. Pinkham's Vegetable Compound over the diseases of womanhood is not because it is a stimulant, not because it is a palliative, but simply because it is the most wonderful tonic and restorative ever discovered to act directly upon the generative organs, positively curing disease and restoring health and vigor.

Marvelous cures are reported from all parts of the country by women who have been cured, trained nurses who have witnessed cures and physicians who have recognized the value of Lydia E. Pinkham's Vegetable Compound, and are fair enough to give credit where it is due.

If physicians dared to be frank and open, hundreds of them would acknowledge that they constantly prescribe Lydia E. Pinkham's Vegetable Compound in severe cases of female illness, as they know by experience it can be relied upon to effect a cure. The following letter proves it.

Dr. S. C. Bringham, of 4 Bringham Park, Fitchburg, Mass., writes: "It gives me great pleasure to say that I have used Lydia E. Pinkham's Vegetable Compound very efficaciously, and often prescribed it in difficult cases."

"My oldest daughter found it very beneficial for a female trouble some time ago, and my youngest daughter took it for a female weakness, and is surely gaining in health and vigor."

"I freely advocate it as a most reliable specific in all cases in which women are subject, and give it honest endorsement."

Women who are troubled with painful or irregular periods, bloating or flatulency, weakness of organs, displacements, inflammation, ulceration, can be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound. If advice is needed write to Mrs. Pinkham, at Lynn, Mass. She is the daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women. She has guided thousands to health. Every suffering woman should ask for and follow her advice if she wants to be strong and well.

write and devoted young mother gone—no wonder hearts are heavy to day and eyes filled with tears, when you think of the young mother who has not left you. She is still stepped into the other room of the Father's house for:

"There is no death what seems in transition
This life of mortal breath,
The life of the life of the life eternal."

Whose petals are cold death?

You will lay this dear body to rest near the old Kentucky home, but as you stand by the open grave, recall that prophetic voice which says "She is not here she is gone." Tell the little boy that his mother still loves him and watches over him as she always prayed God to guide him in the night of way: Yes she loves you all as ever, and will be waiting to welcome her fond husband, mother, and little ones, when you come over to that heavenly home to be forever more with the blessed Savior.

Rev. J. S. A. Chicago.

If you ever bought a box of Witch Hazel Salve that failed to give satisfaction the chances are it did not have the name 'E. C. Dewitt & Co.' printed on the wrapper and pressed in the box. The original DeWitt's Witch Hazel Salve never fails to give satisfaction for burns, scalds, cuts, better cracked hands, etc. For blind, itching, itching and protruding Piles! It affords almost immediate relief. It stops the pain. Sold by All Druggists.

Saving Niagara

From an Editorial in the May Century.
The question as to whether Niagara should be used solely as a source of mechanical power, or be preserved as a beautiful and wonderful natural feature, has come up in our day for permanent decision. There are some minds that have decided, for themselves, in favor of the former proposition. But they seem, fortunately, to be in a minority both in Canada and in the United States. Niagara is to be reserved both in what have been called its "little loveliness" and in its grandeur. America is "practical"; it has allowed its forest to be dangerously diminished. It has allowed Niagara to be seriously harmed. On American soil, when once aroused, is irresistible, and American sentiment has declared in favor of Niagara as Niagara.

The Duncan House has a new iron fence across its front yard.

Dispelled His Fears.
Old Gentleman—It is folly to talk of marriage for your son, my daughter is a mere child. She knows nothing about the world and could not manage servants. Mr. Simpkins—Oh, that is no reason. The slightest difference! We shall have you.

Our Best.
We need not be discouraged because of the great things others accomplish and which are far beyond the range of possibility for us. It is only our own best that is required of us, our own and not another's—Woman's Life.

SPARTAN POLICE CAPTAIN.

He Ordered the Capture of His Son Dead or Alive.

Within a few years the son of a police captain in New York was charged with shooting a man. He had been a wild boy, had enlisted from a southern state where he had been for several years before the Spanish war called his militant spirit into life, and when he came back from Cuba, where he distinguished himself for bravery, he opened a saloon next door to his father's station house.

After the charge of assault with intent to murder he fled. The crime, if any had been committed, was while his father was away from the city. The captain returned to duty, and immediately, addressing the policemen lined up for instruction before him at 6 o'clock, said: "There is another matter which must exact all your vigilance. It is the arrest of a man charged with murdering a man in this precinct. The shooting took place in a dance hall. There seems to be little reason to look for any other person than my son. I want him brought to this station dead or alive. You all know him. He kept the saloon next door, and you are familiar with his face. I expect to find him here, and I expect you to fetch him. I could not be a father and say this without unspoken pain. I cannot be a captain of police in this or any precinct and give you any other instructions."

The police filed off to their posts and left the Roman father bowed with grief. Weeks passed. The police did not bring the son to the station house, but at last he gave himself into custody. In the shuffle of justice that takes place in the magistrates' courts before accusations reach the grand jury he was discarded. There was sworn testimony that he was at the other end of the dance hall, that the wounded man was shot with his own pistol, that he accused never carried a weapon, that the trousers he wore that night contained no pistol pocket, that he was not at the hall that night at all and finally that the identification made by the victim was uncertain. So the son of the police captain walked the streets a free man.

The captain had another son who had never seen his brother, who had left home before the younger son was born. Nor had he known his brother's name, because it was never mentioned in the daily newspapers, where it was blazoned forth in startling headlines.

Then he ran into the station house, where the captain sat with the night force lined up to receive instructions as before. With the heading impetuously of youth he cried: "Father, what's this story about your son shooting a man? All the boys at school are talking about it. I fought them. I want to know if it is father. What is it? He's my brother, isn't he? Is he your son? Who is he? Tell me."

The captain gathered the boy to his arms and with a wave of the hand sent the policemen away to their duty, many of them with humid eyes.—New York Press.

Frangipani Flowers.

Frangipani flowers, from which the well known perfume takes its name, comprise some forty species, which grow wild in tropical America. Botanically they are known as plumeria, and Plumeria of Jamaica is known as the red frangipani. They are cultivated as pot plants, and have been introduced widely into the eastern tropics, finding a place in many of the native countries. Three species are occasionally met with in the gardens of England, as in the old Palace gardens at Seaton, where two very fine specimens may be seen in full bloom during the summer and autumn. These flowers were used to scent the bread in certain religious ceremonies at the Vatican. This bread, being broken up was known as frangipani, which means broken bread, and so the name passed on to the flowers used to scent it. It is interesting to note that the Frangipani were one of the oldest sentimental families in Rome and that they bore on their arms a piece of broken bread. This is what is known in heraldry as a "vaunting" coat of arms—that is, one which is more or less a pun on the name. Dante's biographers have on some what slender grounds endeavored to trace his descent from the great family of the Frangipani.—London Globe.

Famous Blades of Toledo.

The Spanish towns were celebrated throughout the civilized world for the excellence of their swords, and among them all Toledo stood unrivaled for the temper of her steel. The Toledo blade, famous in song and story, was so keen, so flexible and withal so strong that its blades became proverbial. When the Moors overran Spain in the ninth century they were already masters of many of the arts, and especially were they adepts in the working of metal. Their swords were highly valued for their delicate temper, and their special decoration, which we still call damascening, was also justly prized. It was from these conquerors that the Spaniards learned much of their skill in forging and tempering steel. And that the completeness of the nobles and on men ever made should not be marred by the lack of any element, natural or artificial, the fairy godmother, Nature, contended with the gift. On the banks of the Tagus there is an abundance of fine sand. In the process of forging the metal is taken white hot from the furnace and is subjected to a cooling process. It was to the peculiar properties of this white Tagus sand, in which the cooling blade was buried, that the Toledo swords owed their unequalled hardness and great flexibility.

COFFEE HOUSES.

The First of Them That Were Opened in Old England.

Our ancestors could little imagine that their descendants would be reduced to the necessity of sending to the East and West India for the materials for a comfortable breakfast. It is observed that while Nathaniel Conolly, a Cretan baron, continued in the college, in Oxford, which he left in 1648, he made the drink for his own use called coffee and usually drank it every morning, being the first coffee, as the ancients of that house informed him, that was ever drunk in Oxon.

In the year 1650, we learn, "Jacob opened a coffee house at the Angel, in the parish of St. Peter in the east, Oxon, and there it was, by some who delighted in novelties, drunk. In 1654 Cinques Jolson, a Hebrew and Jacobite, born near Mount Libanus, sold coffee in Oxon, and in 1655 Artill Tillyard, apothecary, sold coffee publicly in his house against All Souls' Coll. This coffee house continued to look for his majesty's return and after, and then they became more frequent and had an exercise set on coffee."

The author of the New View of London (1708) found it recorded "that one James Farr, a barber, who kept the coffee house which is now the Rainbow, by the Inner Temple gate (one of the first in the city) was in the year 1657 presented by the Inquest of St. Dunstan's in the west for making and selling a sort of liquor called coffee as the ancients would have been (as now, 1708) so much drunk by the best of quality and physicians?"

In the Kingdome's Intelligence, a weekly paper, published by authority in 1692, are inserted four advertisements, the last of which is as follows: "At the coffee house, in Exchange alley, is sold, by retail, the right sort of powder, from 4 shillings to 8s. 8d. per pound, as in goodness; that pounded in a mortar at 2 shillings per pound; also that termed the East India berry at 18 pence per pound, and that termed the right Turke berry, well garbled, at 3 shillings per pound; the sugarberry at 2 shillings per pound; 4 shillings to 10 shillings per pound; also sherbets made in Turke of lemons, roses and violets perfumed, and tea or chocolate, according to the goodness, for all of which if any gentleman shall write or send they shall be sure of the best as they shall order and to avoid deceit. Waiters stand under the house seal—viz. Morat the Great, etc. Further, all gentlemen that are customers and acquaintances are the next New Year's day listed at the sign of the Great Turk at the new coffee house in Exchange alley, where coffee will be free of cost."—New York Herald.

Japanese Hard to Shave.

"It's a hard piece of work to shave a Japanese," said a New York barber who had just finished shaving one. "That man hasn't more than a couple dozen hairs on his face, and yet it takes me longer to shave him than any other man who comes into this shop. You see," he went on, "the Japs have such curious hair that I have to practically take each one separately and there will be trouble not only with him, but with my razors. You can go against the grain with the average man and not bother him a bit, but if you try it on a Jap there's trouble. His hair is like so much wire unless you handle it just right."

The easiest man to shave in the world—and I've worked in almost every country where a barber can get a show—is a pure blooded African. His skin is like a beautiful piece of satin, and his hair is so fine and soft that it is a pleasure to have anything to do with it. Curiously enough, if you cross an African with any other race there is trouble for us at once—that is, so far as shaving is concerned. But for a nice hard job spare me from a Japanese."—New York Press.

Too Busy.

Extreme "busyness," whether at school or at college, Kirk or market, is a symptom of deficient vitality, and a faculty for idleness implies a catholic appetite and a strong sense of personal identity. There is a sort of dead alive, hackneyed people about who are scarcely conscious of living except in the exercise of some conventional occupation. Bring these fellows into your country or set them aboard ship and you will see how they pine for their desk or study. They have, no curiosity, they cannot give themselves over to random provocations, they do not take pleasure in the exercise of their faculties for its own sake, and unless necessity lays about them with a stick they will even stand still. It is no good speaking to such folk. They cannot be idle, their nature is a mechanical, and they pass those hours in a sort of coma which are not devoted to furious mulling in the gold mine.—Stevenson.

Narrow Escapes.

Two tales of narrow escapes at Lucknow during the siege of the Residency are given in English publication: "Colonel May told many thrilling incidents of the siege, which brought the scene more vividly before one. He pointed out a wall against which he told me he was sitting one day, when suddenly a round shot struck the wall between his legs. On recovery, it was to be compared with the escape of a trooper in the relief force, who had his saddle destroyed under him by a blind shell which passed between his thigh and the horse's back, he himself and his horse remaining uninjured."

SUMMER THIS SUMMER
IN COLORADO

Many people put aside all thought of an outing in Colorado because they are accustomed to consider this greatest of American playgrounds as one of those impossible things beyond their means. Time was when a visit to the "Top of the Continent" was a great luxury, as high in price as in altitude, but not so today.

You can spend the Summer or a part of the Summer in Colorado and live as reasonably as you do at home, and the quick service and low tourist and excursion rates afforded by Rock Island lines bring the Rockies within your easy reach. Our booklets and folders give the whole story.

MAGAZINE SECTION.

MISS HELEN CANNON.

One of the First Ladies of Official Society at National Capital.

She Often Graciously Presides at War Councils of the Nation's Chiefs.—Democratic in Manner and a Famous Housekeeper.

The distinction of being the best-posted woman in America on politics and statecraft, is generally accorded to Miss Helen Cannon, daughter of the Speaker of the U. S. House of Representatives. Speaker Cannon who is genial and democratic in manner, is a man of many close friendships, but no one is so close to him as his only unmarried daughter who has presided over his household since the death of his wife, many years ago.

Miss Cannon emphatically disproves the theory that a woman cannot keep a secret. As the confidante of the official, who, next to the President, is the most powerful man in the United States, she probably knows more of what is going on "behind the scenes"

When Congress is not in session, Miss Cannon is mistress of her father's home at Danville, Illinois. There, as in Washington, she is always prepared for company, for the Speaker's married daughter with her children, spends much time at the Cannon home, and relatives and friends always feel free to "drop in" at almost any time.

Official Feminine Calls.

In the social life of the national capital, Miss Cannon occupies, by virtue of her father's position, a unique position. Possibly not all our readers are aware of the many unwritten laws that govern the exchange of calls between women whose husbands or fathers occupy prominent positions at Washington. For instance, official etiquette prescribes that the wife of a newly elected Senator or Representative must make the first call upon the wives of all those Congressmen who are her husband's seniors in service. Miss Cannon, however, in accordance with these same unwritten laws, is not compelled to make a "first call" upon any ladies in Washington, save the wife of the President and the wife of the Vice President. All this fuss as to who shall call first may appear ridiculous to persons who are not brought in contact with life at our seat of government, and possibly Miss Cannon who is thoroughly democratic may re-

ICEBERG IN DELAWARE.

Huge Mountain of Ice Towed From Grand Banks of Newfoundland.

The Strenuous Work of a Tug's Crew—One of the Strangest and Perhaps the Most Valuable Prize Ever Taken by a Ship.

In order that the city of Philadelphia might be rescued from an ice famine a powerful coasting tug has accomplished the almost impossible feat of capturing a huge iceberg, and towing it into port. Never in the world's history has this wonderful achievement been duplicated, and contrasted with it the fascinating exploits recounted by the marine historian Sinbad, the sailor, appear commonplace and trivial.

With its mountain of ice in tow, the tug passed up the Delaware River creating consternation among the floating world on the stream, as observers could not imagine other than that the floating mountain was being driven up the bay by some freak of wind and current, to the great danger of shipping. Its approach was responsible for some frenzied telegraphing which threw the shipping interests into a panic. Orders were issued to hold up the sailing of every vessel due to leave, and tugboats were dispatched to lower Delaware station to intercept several out-bound steamers and warn them to seek anchorage out of the berg's path.

Maritime Interests Excited.

For several hours maritime interests were intensely excited by the unheeded presence of an iceberg in the bay. Later, when the true story of the wonderful feat was flashed over the wire, it seemed so utterly incredible that the excitement, if anything, was increased. It was not until one of the fastest tugs in the harbor had steamed down the bay and wired verification of the story that the panic was allayed. Only the providential co-operation of the winds and tides, and the favorable weather conditions enabled the tug to accomplish the feat. In spite of the almost inconceivable risk attendant upon the berg's capture, not a member of the tug's crew was injured.

Two Men Frost-Bitten.

Two men suffered from bad frost-bites, but this was due to their carelessness in braving the arctic temperature in the berg's vicinity without proper clothing. Their experience was a warning to the rest of the crew, and when the tug with the prize was towed back to the city, the men were muffled as if for a heavy relay.

The length of the iceberg was 500 feet, and it is estimated that it will yield fully 500,000 tons, which is nearly sufficient to make up the shortage in ice crop due to the mild winter. The work of cutting up the mountain of ice will have to be pushed because of the rapidity with which it will melt under the spring sunshine.

The monster berg was captured off the Grand Banks of Newfoundland. It was made fast at great risk by the daring men on the tug, who, in small boats tied staunchly to the mountain of ice, and then let out a long tow-line from the tug and, with grapping hooks, secured the berg, which held firm after several attempts had resulted in failure. The crew of the tug will share in the money the prize will yield. As icebergs are broken off portions of glaciers, the ice yielded will be of good quality.

School Garden Education.

Every child likes to play in the mud and dirt, to make sand houses and caves, mud pies, and even to plant a garden, breaking off the twigs of trees and pulling weeds, which are carefully planted and watered, furnishing diversion and pleasure for the day. It is an easy matter to direct the youthful mind a little further along this line and interest it in a real miniature garden. It is not an unfounded theory, but a fact, abundantly proven in the large and many of our small cities. Philadelphia has what are called "Municipal Gardens." Boston has a dozen "School Gardens." Chicago, Detroit, Washington, Cleveland, Los Angeles, and many other cities have successfully worked out either the school garden or the vacant lot cultivation idea, two separate propositions.

It is true, but closely allied. The school garden idea opens up an easy road to the vacant lot proposition, and a more direct way to the latter. The young New York has only one such farm garden, but on its own premises, the children plant and raise both flowers and vegetables, while in an extemporized cook-house they prepare the vegetables for the table and enjoy the flavor of the fruits of their labor. Besides this instruction in the culinary art, a bedroom in miniature furnishes an opportunity for the girls to learn how to care for rooms.

In Philadelphia, the school gardens are the children's delight to plant and cultivate, furnishing object lessons of the utility of such work which is loved by the children. The school gardens may lead to its addition to the school curriculum, and with this idea in mind, these school gardens are located quite generally on land adjacent to school-houses, some of the regular school grounds, and some in the hands of private instructors.

The effect upon the little workers in these plots is in every way happy and should lead to their more general use.

MADE FORTUNE IN WORMS.

Maine Florist Travels to Sweden After Breeding Bait.

By far the most popular bait for all kinds of fishing in Maine are the earthworms, which have the odor of the ground about them and which seem to be choice tidbits, not only to trout and landlocked salmon, but also for pickerel, perch, black bass and, indeed, every species of food fish that swims in fresh water. As the Maine soil is deficient in humus and lacking in decaying vegetable matter, anglers are not plentiful, and the worms are more than ten years ago Carl Beers, a florist of Bangor, went into the business of rearing earthworms for the purpose of selling them to the local fishermen, as well as for shipment to Boston. He imported a breed of dark purple worms from Belgium, which were prolific breeders, though coarse and strong flavored, and later he secured a box of giant angworms from India. In the course of a few years he was able to supply five worms by the million to his customers.

Those shipped to Boston were sold in job lots of 25 cents a pound. To the home customers he sold worms of average size for 10 cents a dozen. Though the worms here were small ones, and though his trade in flowers was never extensive, he made money enough from the sale of worms, until last year, when he retired and went to his old home in Sweden, a wealthy man.

Sidney Cook, of Presque Isle, the inventor of several diving appliances used by men who upon deep water, was the next man to attract attention as a public benefactor in the bait line. Mr. Cook says his invention was made possible through having watched the Indians of Canada, when they sought worms for bait, dig down the soil with their hands, and then, "said he," "and feed on the grasses and rotting leaves on the surface at night." He saw that the worms were busy eating the Indians of Canada had a habit of dragging a blanket with its under side smeared with bird lime along the surface of the land, thus picking up the worms together with sticks and lumps of earth and small pebbles.

After dredging the land for a time the Indians carried the blanket to the camp, picked off the worms, and added another coating of bird lime. Though the worms have been used so much for my invention, it is not mine by rights, as I gained the idea from Indians.

Already the worms have been used in the fishing line. Around the Falls is Manned by Power Plants.

The American Falls Threatened to be Destroyed by Water Diversion.

The beauty of Niagara Falls little can be accomplished, and from past experience it seems more than doubtful that the conclusion of Canada's probable attitude in the international boundary and the seat controversy, Canada certainly did not intend to surrender the spot, and there is no reason to assume that her attitude has changed in the least, but because of two very important facts, she all her great influence with the mother country to defeat any friendly agreement that might be proposed.

It is asserted that Ontario Province is not reached entirely on account of an unfriendly feeling, but because of two very important facts, one of these is the greater width and depth of the channel on the Canadian side, which would insure a splendid flow over the Horseshoe Falls after the American side is entirely dry.

It is further asserted that additional water could be granted by cutting a canal through the rocks of the Falls, while the American Falls would be entirely drained long before this twenty-first day of the month, and would seem, however, to be a

NIAGARA FALLS IN DANGER.

Joint Resolution in Congress For Their Preservation.

Proposal to Unite With Canada in an Effort to Stop Further Depredations Which Will Destroy the Scenic Grandeur.

At last the national law-makers have come to a realizing sense of the danger which threatens Niagara Falls, the most beautiful of all the world's natural wonders.

By a joint resolution of the Senate and House of Representatives the International Commission, even now under the River and Harbor Act of 1902, was requested to report to Congress, at an early day, what action was, in their judgment, necessary and desirable to prevent the further depletion of water flowing over Niagara Falls, in conjunction with the members of said commission representing the Dominion of Canada, if practicable, all possible efforts for the preservation of the falls in their natural condition.

Report of Committee.

This Commission promptly reported that if any benefit was to be derived by legislation, immediate action was necessary and outlined a plan which it believed would have the desired effect, providing Canada would unite with this government in curbing the greed of promoters and speculators.

The report says, in part: "As a step in that direction we recommend that legislation be enacted which shall contain the following provisions, viz: "The Secretary of War to be authorized to grant permits for the diversion of 25,000 cubic feet of water per second, and no more, from the waters naturally accruing to Niagara Falls, which it is to be produced in the New York State, except such as may be required for locks in navigation of canals."

The foregoing prohibition to remain in force two years, and then to be made the permanent law of the land, and the Canadian government shall have enacted legislation prohibiting the diversion of water which is naturally tributary to Niagara Falls in excess of 25,000 cubic feet per second."

Dependent on Canada.

It will be noted that unless the British government unites with this country in its effort to save the natural

remedy for the evil which is being done, and one which is not dependent on Canadian co-operation. This remedy could be accomplished by New York State alone, and would be to so deepen the river channel south of Goat Island, between that island and the New York State bank, that the American Falls would divide with the Horseshoe whatever water was not diverted from its natural bed. The Treaty of Ghent places the American boundary at a point well out into the deep part of the river channel and affords ample opportunity to make necessary excavations.

How the American Falls Might Appear in the Near Future.

If anything is to be accomplished in the matter it is necessary to act at once, for if more corporations obtain control of the water rights it will be impossible for either the nation or New York State to repurchase them without absolutely enormous expenditure of money.

Lack of Interest.

It is certainly to be regretted that the American people have so long neglected the most beautiful fall of water in the world, and have allowed any part of it to be converted to private gain or corporate greed. Even now, in the face of all that has been said and written on the subject, there seems to be an attitude of half-heartedness on the part of the people to act, which is well illustrated by the fact that Senator L. H. Howe, of New York, who has introduced a bill for the purpose of saving the falls, has asked the Senate to kill his bill, fearing the taking of water from Niagara would destroy the power purposes and says in defense of his action, "I cannot find any sentiment in favor of protecting Niagara Falls, and I'm tired of being attacked on the subject of my bills relating to this subject."

MAMMOTH INCUBATOR.

A Hatching Machine That Does the Work of One Thousand Setting Hens.

The largest incubator in the world, with a capacity of 15,000 eggs, has just been completed by W. V. Hall of Pembroke, N. Y. It is 102 feet long, and 4 feet inches wide. Partitions divide it into 100 compartments, each accommodating two trays. The trays have wire bottoms, and hold 75 eggs each. To fill this incubator with incubated eggs would require an expenditure of \$6,000 for eggs of the quality of freshness would cost forty cents a dozen. As one hen covers fifteen eggs for hatching, it is evident that the work of 1,000 fowls, and has the capacity of one hen sitting constantly for several days.

The incubator is heated by means of a coil of eight steam pipes passing over the top of the egg chamber on one side and returning on the other. These pipes are connected, at one end of the structure, to a water tank heater. The water flowing through the pipes is heated to exactly the right temperature, a thermostat attached to the stove opening and closing the drafts to make this possible. The only attention required by the heater is to keep the water at a certain level, and the thermostat is an expansion tank, 10 by 18 inches, which stands over the heater. The tank is filled with oil, in which is a float. As the heat of the furnace causes the oil to expand, the float expands, and the float in the oil rises. The float is connected to a lever attached to the floatarm, and shuts the draft of the heater; another lever at the same time opens the cold-water pipes of the furnace. In this way the temperature is regulated automatically, and the water in the radiator (75° eggs being kept at 102 degrees) is never over.

A second novelty is that the heat of the eggs is regulated by raising or lowering them in the egg chamber, which is nearly a foot high inside, burlap separating it from the eggs. The egg trays rest on double frames hinged by galvanized arms or levers. As the chicks develop, the trays are lowered on these supports, the first drop being made in six days, and others at intervals, until, on the twenty-first day, the eggs are resting on the bottoms of the chambers. All fertile eggs are tested out on the seventh day.

Mr. Hall built small incubators at first, but the oil bill for forty of his small incubators was so heavy that he built a large incubator was run three months at an expense of less than \$8 for

MISS HELEN CANNON.

DAUGHTER OF THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

in official life than any other member of her sex, yet never so much as once has she let her tongue slip more than "mum" was the word, and this more than can be said of some of our exalted position.

Mother, Speaker Cannon's confidence in his daughter's discretion and common sense is shared by the leaders in the lower house of Congress who have occasion to confer frequently with the presiding officer. Many of these confidential confabs are held at the unpretentious vine-covered brick house which constitutes Speaker Cannon's Washington home, and many times a newcomer at such a conference has been surprised to see the wheel horses of our national legislature freely telling state secrets before the hostess.

Jays of Good Cooking.

Incidentally it may be noted that Miss Cannon is largely responsible for so many of these political star chamber sessions being held at the Cannon residence instead of in the Speaker's private office at the Capitol or somewhere else. Few readers of this need be told that the average man sets great store by good cooking, and the popularity won by Senator Hanna's famous "hash breakfasts" goes to prove that the President and other high officials of the nation are no exception to the masculine rule.

Well, just here one has a hint as to the magnet which helps to draw many of men of affairs to the Speaker's home instead of to his office. Miss Cannon is a splendid housekeeper, and is an expert in preparing or superintending the preparation of those plain, wholesome dishes which never fail to make a hit with men who are weary of hotel cooking. In things to eat, as in dress, Speaker Cannon does not go in for much in the way of "frills," but no man who knows what is in store for him ever declines an invitation to dine at his house.

gaid it in that light too, but the fact remains that the enforcement of such recognition is due the dignity of her father's position, and she is too good a politician not to insist upon the Speaker of the House enjoying all the prestige which is due him. Should Mr. Cannon one day be President of the United States, as is by no means impossible, his daughter will be reared of her kindness and democracy, make an ideal First Lady of the Land.

URGES EASY SPELLING.

Supreme Court Justice Joins With Other Well-Known Men—Carnegie Gives Fund To Aid Cause.

Associate Justice David J. Brewer of the United States Supreme Court is deeply interested in the adoption of a scientific regulation of English spelling.

Justice Brewer is a member of the board of which Brander Mathews, of New York, is chairman. About 750 have agreed to adopt for customary use in their own personal correspondence the following twelve simplified spellings, heretofore recommended and used by the National Educational Society, namely, program, catalog, decalog, prolog, demagog, pedagog, tho, altho, thoro, thorefore, thru and throug.

In May and June, 1905, many distinguished scholars, literary men, and scientists signed the promise, and now the committee has been permanently organized, under the name of the Simplified Spelling Board. Funds adequate for the purpose have been given by Andrew Carnegie, the justice of the peace, to the amount of \$15,000, the income of which is to be devoted to the interests of the organization.

Among the members of the board are E. Benjamin Andrews, chancellor of the University of Nebraska; David J. Brewer, associate justice of the Supreme Court of the United States; Nicholas Murray Butler, president of Columbia University; Andrew Carnegie, of New York; Prof. James H. Horn, of Yale; Prof. James H. Horn, of Yale; Benjamin R. Smith, editor of the Century Magazine; W. H. Ward, editor of the Independent, and Andrew J. White,

KING CORN.

How the Farmer Can Double His Great American Crop.

Corn planting time! The United States this year will have over 90,000,000 acres planted to this king of crops. For this enormous acreage 15,000,000 bushels of seed will be required.

Probably but little thought is given by the average farmer to the germinating quality of the seed used, for he has so long been accustomed to getting a "stand," under ordinary favorable conditions, varying from 60 to 85 per cent, that many have come to believe a more complete stand impossible. Yet experiments have shown that barring unfavorable weather at planting time, the work of germs, worms, and the like, there is no reason why a stand of corn should be less than 95 per cent. Of recent years, however, conditions have most improved, and never before has there been such a demand for seed corn of high vitality. Some of our best farmers are beginning to realize that one of the great factors in profitable corn production is the use of seed which will show a high per cent of germination.

If each corn grower would give a little time during the early spring to the testing of the seed, the vitality of each individual ear of corn intended for planting could be readily determined. The poor ears could then be discarded, and the millions of bushels of seed corn which fall to grow each spring could be very profitably converted into pork and beef. Of the 15,000,000 bushels of seed corn which will be planted this year, it is almost certain that from two to three million bushels, or nearly 20 per cent, of the corn first planted, will fall to grow as a result of the low vitality of the seed. Thousands of acres will have to be replanted either in their entirety or in part, and many thousands more will grow in the future with an imperfect stand.

WHAT MAKES THE CORN AVERAGE LOW.

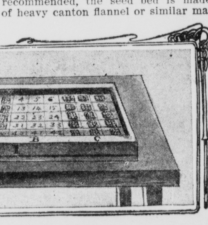

The kernels tested fail to germinate or show only weak sprouts, the proportion will be the same for all of the kernels on such ears. And the experienced corn grower will be not a little surprised to find many a fine looking ear of corn among his selected seed, the kernels of which will not sprout at all.

Better Now Than Not at All.

Germination tests should be made five or six weeks before planting time, but even if it is necessary to stop the test in the field, it is far more profitable to have a good stand of corn on 10 acres than it is to have a poor stand on 20 acres, thereby saving the time and labor necessary to prepare the ground and to plant and cultivate the additional acre.

In making the tests it is essential that each ear tested should be given a number and all kernels taken therefrom given a corresponding number so that after the tests the faulty ears may be thrown out.

Many kinds of germinating boxes and methods for testing seed corn have been described in various publications, but the Department of Agriculture has designed a simple box which is believed to combine most of the advantages of each, and which will serve the hands of almost any operator. The box would be about 1½, or 2 inches deep inside and the length and width according to the size of the kernels. It should be made of wood, and it should not be made water-tight. Instead of filling the box with sand, soil, or sawdust, as is commonly recommended, the seed bed is made of heavy canvas flannel or similar material.

A SIMPLE GERMINATING BOX.

sons for this, the principal reason is probably carelessness in the use of seed of low vitality.

To Test Each Corn Ear.

The statement is made by officials of the Department of Agriculture that while corn breeders have achieved marked success in the production of improved types of corn during the last decade, unless the average farmer uses ears of their seed corn and test each ear separately, preparatory to planting, the chances are that the average yield of corn per acre in the United States will not be materially increased.

In our principal corn-growing States, corn is planted in hills 2½ feet apart each way, giving 3,556 hills per acre. In most sections three stalks to the hill is considered a perfect stand; in some States, two is the standard. Yet if each hill would produce but one medium sized ear, the average yield per acre in the United States in 1905.

A single ear of corn to the hill is shown as B in the illustration would give an average of 28.8 bushels to the acre; a single ear shown as B would give 20 bushels per acre; an ear such as C would produce 40 bushels per acre; an ear such as D would yield 50 bushels per acre, while an ear like E, which weighs a trifle less than a pound, would yield 50 bushels of shelled corn per acre, or only one such ear for each of the 3,556 hills. There are, however, very few farmers who raise as much as a bushel of shelled corn per acre. Yet every corn grower can probably produce many ears which are larger than those shown as B in the illustration. However, both ears D and E are granting that every farmer should harvest from each two such ears as the one shown as C, an ear which is less than ½ inch long, and weighs 12.6 ounces, the yield would be 30 bushels per acre.

terial, using two or three thicknesses of cloth in the bottom of the box and one or two thicknesses of cloth for covering the kernels, and then the box has been filled. The cloth at the bottom should be marked off into squares, each of which is to be filled with kernels from ears which are given a number corresponding to the square used.

A Very Simple Test.

For use, first wet the cloth thoroughly by soaking in water after then place the half cloth, double thickness, which has been marked in squares, in the bottom of the germinating box. The kernels from ear No. 1 are then placed, row side up, in square No. 1 and so on. When all of the squares have been filled, fold the other end of the cloth carefully over the kernels. If during the soaking the cloth has become very damp, then soak it with water.

cover the box with a piece of glass, or other tight material, to prevent the evaporation of the water from the cloth, and set the box aside for a few days await the results of the test. Where only a limited number of ears are to be tested, a dinner plate, germinating apparatus may be made by using cloth between two similar plates. Ten inch plates will give ample space for the testing of 10 ears at one time. It is important that the ears be numbered or arranged in the same definite order as the contents of the germinating box. One of the most satisfactory methods in the use of a rack is generally used. This is a piece of 2 by 2 inch piece of pine from which extend on all four sides long nails, each of which is numbered. After the kernels from the first ear have been placed in square No. 1 of the germinating box, the ear is shown on nail No. 1 of the drying rack, and so on. These racks can then be

COMMON DINNER PLATE FOR SEED TESTING.

of the average yield and price for the last ten years.

A full description of how to make tests is found in Farmers Bulletin No. 253, by J. W. T. Davel, which can be had from Members of Congress or the Secretary of Agriculture.

WOMAN'S ADVICE TO FARMERS.

Miss Edith Urney, an Iowa hospital specialist, states that many of the inmates of eastern insane asylums are sons and daughters of the farmer. They have been brought up to lives of idleness and luxury or suffered from monotony of country surroundings. In either case the direct cause of mental derangement is the lack of diversified work for body and mind. The pioneers of the country have no time for brooding over imaginary troubles and were happy. But they neglected to map out the proper course for their children, and in treating them with kindness have paved the way to insanity.

Many of the present numerous cases of physical and mental wrecks of young persons brought on by idleness and strenuousness in the battle for supremacy. Farmers warn their sons and daughters of the dangers that lie in their paths when they neglect the farm, but often forget to correct the evils at home. They give their children all the benefits of modern education, but neglect the essential fundamental principles of life. Too many are left to remain in idleness because they are taught in

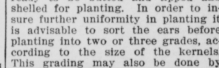

CAN NOT YOU GROW TWO EARS LIKE "E" TO EACH CORNHILL?

which they represent should be taken for seed. There will also be cases in which all six kernels have germinated, but will be lacking in vigor. While the chances are that the ears of corn, the chances are that they will never develop, or else will produce but a barren stalk. It is only necessary to remember that all ears showing dead kernels or weak or poorly developed sprouts must be discarded and only those used for seed in which every kernel tested has given a good healthy sprout. The ears which have shown a perfect germination are now ready to be butted and tipped and shelled for planting. In order to insure further uniformity in planting it is advisable to sort the ears before planting into two or three grades, according to the size of the kernels. This grading may also be done by screening, if more convenient.

Remarkable Results of Government Tests.

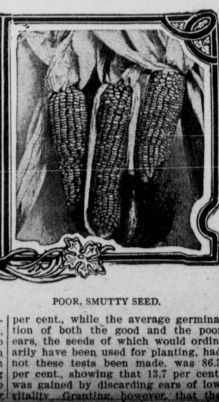

The Department of Agriculture recently made tests of seed corn furnished by farmers in the corn producing States, and of the 3,322 ears tested, 1,906, or the starting percentage of 57.37 per cent, were unfit for seed. These samples were taken from ears picked for seed by good, careful farmers, and are evidently much above the average. The average germination of the 1,906 poor ears was only 71.7 per cent, while the average germination of both the good and the poor ears, the seeds of which would ordinarily have been used for planting, had not these tests been made, was 86.3 per cent, showing that 13.7 per cent was gained by discarding ears of low vitality. Granting, however, that the

samples tested are representative of the present supply of seed corn, the testing of every ear and the subsequent rejection of poor ears will increase the stand 13.7 per cent. This increased stand would mean an increased yield of 293,140,695 bushels, with a value of \$100,739,912.91 calculated on the basis of 34 cents per bushel.

JOURNALISM IN CHINA.

Dialect Newspapers Increase Gulf Between Provinces.

United States Consul Anderson, at Amoy, has made a report on journalism in the Chinese Empire. He says:

"It is rather surprising in view of the comparatively small population of foreigners in China, how many large publications there are in foreign languages. The prices they obtain for their publications are their own, and they probably explain the situation. Shanghai has five daily newspapers, three morning and two evening papers; one is French, it has six foreign weeklies, one German. It also has four Chinese dailies and a large number of Chinese weeklies.

"Practically all of the foreign papers sell for 4½ cents gold per copy; the subscription price is about \$15 gold per annum, postage extra. The Chinese dailies sell for about 1½ cent gold per copy. In addition to these publications there are many religious papers, mostly in Chinese, published by the mission authorities.

"In the south Hong Kong dominates the publication business, and a large number of publications are published from that port. There are a few publications might reasonably be expected to lead, but on the face of the record are not predestinate. There are four English dailies, the Post, the Press, both morning papers, and the Telegraph and the Mail, both evening papers.

"There are six Chinese dailies, and, as in the case of Shanghai, a large number of publications are designed to fill various wants in South China. A Portuguese weekly and a Government Gazette, both among them. In nearly every port of importance in China there is an English publication of some sort.

"The publication houses, as a rule, both newspaper concerns and commercial publishers, are well equipped for their work. Some of them attempt work in the Chinese dialect, but in the book publishing, and while it is not always an unmitigated success from a technical typographical point of view, it is considered a considerable merit in this line of effort.

"It is rather interesting to note that in the present state of the passing through much the same process with their newspapers and other publications that many have in the United States have passed through. All over the empire native newspapers are being published in the various local dialects, and are more or less local in character.

"The unfortunate in many respects that the publication of newspapers in the several local dialects has developed no general movement. While such publications will afford means of educating the people of the empire, in some lines, they also furnish the means for deepening the gulf dividing the several provinces which differ in dialect. Each newspaper center of high performance and national mission, will develop its own language in its own field to the exclusion of a language which might in time become common to all China."

BICYCLES ON THE WANE.

Over Three Times as Many Factories in 1900 as at Present.

Statistics furnished by the Census Bureau at Washington show a marked decrease in the manufacture of bicycles. Since 1900 the number of establishments has fallen from 312 to 97.

Formerly there were 2,034 salaried officials and employees of the factories where now there are only 350. The fall-off in the number of wage earners was 81 per cent. The capital invested in 1900 was \$29,743,635, whereas in 1905 it was \$1,787,805.

The production in 1900 amounted to nearly 3,000,000 bicycles and was reduced in the five years to little over 500,000.

In contrast with these figures, the motor cycle factories increased from 159 to 230.

New Zealand exports annually \$85,000,000 worth of kauri gum. It is used in the manufacture of varnish.

OLDEN DAYS OF WHALING.

The days of the old-time whaling fleets when more than two hundred full-rigged ships sailed out of New Bedford harbor on three or four year voyages to the most distant and dangerous seas, were over more than half a century ago. The right of Greenland whale of the Arctic waters with his mouth full of whalebone and his cousin, the sperm whale of tropical waters, bearing in its head the precious spermaceti, were practically gone. And the crews of the old-time whaling fleets, many of them brave, keen-eyed Yankee skippers. Their splendid ships, the Annie B., the Mary Jane, the Blue-Eyed Susan, gave lovers of their wives and sweethearts, were the race of gentlemen-adventurers—rotted at the wharves or were degraded to service as coastwise and with them vanished a world of romance and adventure. No men, in the time, truly lived in the "wint down to the sea in ships."

But when the pennant of the last old-time whaling fleet was waved forever, there still proudly swam the oceans the vast roving and racing whale, greatest of all his mighty kin. To the sailing fleet of the old days, the whaling was an almost impossible prize because of its tremendous speed. It was practically unobtainable and multiplied exceedingly in both North Atlantic and Pacific waters.

It was the abundance of this leviathan, measuring ninety feet in length and weighing almost as many tons—bulkier larger than a whole herd of elephants—which was the inspiration of the modern whaling industry.

At least one American has succeeded in London journalism. Ralph D. Blumenfeld, late of Milwaukee, is the editor of the London Express.

Artificial pemice stone is now made from a mixture of sand and clay.

About one billion feet of timber in the Black Hill forest reserve has been killed by the Black Hills beetle.

WEDNESDAY, MAY 2, 1906.

IN OLD ADAGE WAYS

"A light purse is a heavy curse"
Sickness makes a light purse.
The LIVER is the seat of nine
tenths of all disease.

Tutt's Pills

go to the root of the whole matter,
thoroughly, quickly and
restore the action of the
LIVER to normal condition.

Give tone to the system and
add flesh to the body.

Take No Substitute.

ANNOUNCEMENT.

For Congress.

We are authorized to announce the HON.
J. H. JOHNSON, of Nelson county, as a
candidate for Congress in the Fourth Con-
gressional District, while to the action of
the Democratic party.

Mrs. N. Tucker has returned from
Louisville.

Mr. Barney Bonler, went to Tell
City Monday.

Miss Verne Ryan was over from
Falmouth Friday.

Miss Jane Lightfoot visited relatives
in Hawesville last week.

Miss Elora Lewis was down from
Adison last week the guest of Miss
Alice Board.

George Keith, of Evansville, was
here Thursday the guest of his brother,
E. Keith.

The magazine section is full of good
things this week. Are you reading
the continued story in it?

Mr. Jake Morrison and family have
moved into the Pine property in the
West End. They formerly occupied
rooms in the Pate House.

Glascock & Co.'s double-coated en-
amel ware at 10 and 35 cents are world
leaders. Never any thing like them
sold at the price.—Glendene.

Misses Virgie Daniels and Verlie
Wendelken went to Louisville yester-
day to attend the commencement of the
Medical Department of the University
of Louisville at McCauley's theatre.

Mr. Chas. Wendelken, a brother of
Miss Wendelken, is a member of the
graduating class.

We sell the Winton shirts for men.
These shirts are of the proper propor-
tion and perfect fitting made for high
class trade. They are regular \$2 shirts
but we sell them at \$1.50.—Glascock &
Co., Glendene.

The News is in receipt of an invita-
tion to the annual commencement exer-
cises of the Medical department of the
University of Louisville. Mr.
Wendelken, of this city, is a mem-
ber of the class.

Secretary Wilson of the Department
of Agriculture has sent out warning to
several states of the seventeen-year
locust. Ohio, Kentucky and Indiana
are included in the list. It is said
that the locust will appear in Brecken-
ridge county about the last week of
May. The Secretary says it might be
well not to locate orchards this
spring in newly cleared ground or in
ground near to woods.

I will leave the city in two weeks
and any one wanting photographs tak-
en should call at once. I am prepared
to give the best service and the work
will be executed promptly. Do not put
off coming if you intend to have your
pictures taken. I will leave the city
in two weeks.—U. Brayant, Photo-
grapher

8 Cents

Eight cents a pound is
that a young woman paid for
olive pounds of flesh.

She was thin and weak and
did one dollar for a bottle of
Scott's Emulsion, and by tak-
ing regular doses had gained
olive pounds in weight before
the bottle was finished.

Eight cents a pound is
that a young woman paid for
olive pounds of flesh. Some pay more, some
less, some get nothing for
their money. You get your
money's worth when you buy
Scott's Emulsion.

We will send you a little
rec.

SCOTT & BOWNE, CHEMISTS,
109 Pearl Street, New York.
50c and \$1.00; all druggists.

Shapinsky Brothers' shoes swell and
cheapest in town.

Shapinsky Brothers' clothing 45
cents work shirts beats them all.

Mr. and Mrs. Frank Jolly and child-
ren of Hardinsburg, were the guests
of Mr. and Mrs. Frank Payne Sunday.

Ed Glascock says he has the finest
boy in the land at his home. Born Sat-
urday April 21.

Miss Miss Ella Richards, of Cannel-
ton, has been the guest of Mr. and
Mrs. Darnold Dowden.

Shapinsky Brothers' sell New York
mills oyster pants at 45 cents.

Mrs. J. H. Wells went to Louisville
Monday.

For Sale—10 doz. Geraniums, in
bloom.—H. A. Oelze.

Mrs. Francis Sawyer has gone to
Hardinsburg to visit Mr. and Mrs.
Alfred Heston.

Shapinsky Brothers sell umbrellas at
50 cents.

Misses Adelia Moorman, Ray Hever
and Mand Polk went to Louisville
Tuesday shopping.

Shapinsky Brothers' 45 cent overall
beats any 50 cent overalls on the
market.

Mrs. Fred Fraize will go to Versa-
ille today to visit Mr. and Mrs. R.
N. Hudson.

A splendid line of dry goods bought
right and sold right. We especially
invite you woman to inspect our stock.
—Glascock & Co., Glendene.

Mr. and Mrs. D. W. Fairleigh, their
sons, David and La Rne, and Mr. and
Mrs. Hester Fairleigh, of Louisville,
were in Owensboro Sunday the guest
of relatives.

Two cans of corn for 15 cents. Best
quality.—Glascock & Co., Glendene.

Mr. J. E. Keith has employed Mr.
Don Griswold, of Chicago, an expert
mailed and granite outer and is now
preparing to give the highest class of
service to his many friends. Mr.
Griswold is a very high class and a
very expensive workman. All work
turned about him is the best.

We may all kinds of produce and pay
highest market price.—Glascock &
Co., Glendene.

One line of hats is just the thing
for men. They make an old man be-
come ten years younger and are becom-
ing to all the young men. One is a
line and must be seen to be appre-
ciated.—Glascock & Co., Glendene.

CASTORIA.
The Kind You Have Always Bought
Beware the
Signature of
Chas. H. Johnson

Brayant, the local photographer,
has lately been executing some very
high-class work and a visit to his art
gallery will prove the statement. He
has on hand specimens of beautiful
out-door scenes and copies of photo-
graphs of individuals which represents
in a nice way this young man's natu-
ral ability and talent.

Warning.
You cannot have good health unless
your kidneys are sound, for the kid-
neys filter the blood of impurities
which otherwise act as poisons and
break down the delicate organs of
the body and cause serious trouble. If
you have kidney or bladder trouble, do
not use Foley's Kidney Cure, you
will have only temporary relief for
nothing, as it positively cures all forms
of kidney and bladder disease.

Three Struck By Train.
Bluefield, W. Va., April 27.—Henry
Wilson and wife and Edgar Smith
were struck by a freight train on the
Norfolk & Western road here and
were instantly killed, their bodies be-
ing badly mutilated. The three were
walking on the track and stepped from
in front of one train into the way of
the freight train.

Three Girls Perished.
Charleston, W. Va., April 30.—Three
children were burned to death in the
destruction by fire of the Presbyterian
mission school at Lawson. The school
accommodated both boarding and day
pupils. The victims were two sisters
named Perry and a girl named McGin-
nis. It is supposed the fire caught from
a lamp.

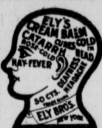

Quaker Cure For Toothache.
Louisville, Ky., April 30.—Edward
Kuehner, 42, who had a mania for
turning in fire alarms, was sent to the
workhouse for one year. His defense
was that he had suffered toothache al-
most constantly and excitement fol-
lowing arrival of the fire department dis-
turbed him temporarily forget his
suffering.

Boys Suffocated.
Louisville, Ky., April 27.—Supposed
to have been smothered to death, the
bodies of Albert Kieler and Leo
Pannmiller, small boys who had been
missing from their homes since
Monday, were found buried deep in
corn in a grain bin of the John G.
Roach distillery.

Lynching Threatened.
Lexington, Ky., April 30.—Aaron
McCabe, a negro, shot and killed Mar-
tin Clark, a barkeeper, here. There is
much feeling against the negro and
lynching is threatened.

Blaze at Glass Works.
Evansville, Ind., April 30.—The bot-
tle blowing plant of the Evansville
glass works burned, causing a loss
of \$119,000.

Nasal CATARRH

Ely's Cream Balm
cleans, soothes and heals the
diseased membrane.
It cures catarrh and drives
away a cold in the head
quickly.
Cream Balm is placed into the nostril, spreads
over the membrane and is absorbed. Relief is im-
mediate and a cure follows. It is not drying—does
not produce sneezing. Large size, 50 cents at Drug-
gists or by mail; Trial Size, 10 cents.
ELY BROTHERS, 52 Warren Street, New York

FIFTH SUNDAY

MEETING A SUCCESS.

The Breckenridge Fifth Sunday
meeting that met with Goshen Glen-
dene Baptist Church, was in many
ways a success. Considering the busy
time with the farmers, the partici-
pation was fairly represented at the
sessions.

The speakers appointed presented
their subjects with credit to them
selves and honor to the cause.

The visitors were delightfully
entertained in the homes of the people,
some of you know what that means.

Saturday dinner was provided for all
"on the grounds". It was all that
could be expected, even from Glendene
people. There was a wonderful self-
sufficiency, but don't think many frag-
ments were left from the basket at
tea t, would not be worth mentioning.
I don't mean to make the impression
that anything was wasted. Indeed, all
was taken up, but not in baskets.

Dr. W. O. Harvey, of the Western
Recorder, was with us on Sunday and
gave a splendid address. The pastor,
D. E. Clapp added largely to the suc-
cess and pleasure of the occasion by
his presence at every session of the
meeting and royal welcome to all.

We are very sorry that the members
of the Mission Board do not come out
to these meetings and attend. The
Lord's work put in their hands by
the association. It stands as all in
to work "while it is day". This ses-
ion of our Fifth Sunday meeting was
closed on Sunday evening after it was
dark, with an address by Bro. John
Winchell.

The next meeting will be with the
Cloveport Baptist church. We are
looking for a very large delegation
from Glendene. I have asked Rev.
E. B. English of the S. B. Seminary
to be here on time and help the pastor
receive them.

Bro. Editor, you asked me to write
some on the above subject. Now, I
want to write some more.

Through the kindness of some of our
Cloveport friends I was enabled to
take my wife and our baby boy out
into the country in a buggy fur-
nished by Bro. John E. Keith, pulled
by a good horse provided by Bro.
Reem Pate. And now we did enjoy
this with the splendid country oppor-
tunity. Our other two babies, through
the said kindness, were left behind. For
all this we are truly grateful.

J. T. Lewis.

See our line of ten cent glasses war-
ranted—Glascock & Co., Glendene.

A RELIABLE MEDICINE.

An Opinion That Should Be of Inter-
est to Every Person in Cloverport.

So many patent medicines and ad-
vertised cures are now offered to the
public that our readers should be glad
to know the opinion of men who have
spent their lives in handling them and
profit by their advice.

A member of the firm of Short and
Haynes, our local druggists, says,
"After having sold drugs, and all
kinds and makes of medicines for so
many years, naturally we have learn-
ed something about them—their value
and power to cure, and we want to
say to our readers of the News that
if the people of Cloverport only realized
the real curative and strength-
creating power of our old liver oil
preparation, Vinol, we would not
have dealer enough in our store to fill
the demand for it."

Continued he, "You see, Vinol is
not a patent medicine, and it actually
contains all the life-giving, body-
building, and strength-creating prop-
erties of cod liver oil actually taken
from fresh cods in the most perfect
drop of the system—creating, nat-
ural oil. Vinol makes rich, red
blood, and tones up and invigorates
every organ in the body."

"In the strongest manner we unhesi-
tatingly endorse and guarantee Vinol
to increase the appetite, remove com-
plaints, give strength and renewed
vitality to the aged, build up puny
children and run-down persons, make
the weak strong, cure chronic coughs,
colds and bronchitis or refund to the
purchaser every dollar paid for it."

"This shows our faith in Vinol and
we can only ask the people of Clov-
erport to try Vinol on our guarantee."
Short & Haynes, Druggists, Adv.

Temperature services will be held
every night this week in Oelze's hall
until after the election on Saturday.

DR. R. P. KEENE, Representing TAYLOR & KEENE, DENTISTS OF OWENSBORO.

Miss Annie Lee Bandy spent a few days in West Point and Louisville last week.

Mrs. Pomp McCoy has just received a new stock of hats and ready made skirts. Call in and see them.

Mrs. J. B. Biggs came home the first of last week from a visit to her sister in Evansville, Ind.

Dr. C. F. Marshall and wife and daughter, Ruth returned Saturday from Louisville where they had been the guests of the Misses Claycomb.

The following pupils of the Irvington private school having attained an average of 90 or over in each subject are entitled to places on the April honor roll of that institution:

Mary Heron, Robert Lyons, Margaret Jolly, Claire Jolly, Wilbert Dowell, Bessie Wrathe, Lewis Herndon, Elizabeth Foote, Eliza Piggott, Walter Piggott, Katharine Wimp, Iris Roe, Kendrick Jolly, Morris McCoy, Herbert Hensel—Miss Edith Marshall, Teacher.

Mrs. C. K. Swealt and niece, Miss Virginia Welbourn, of Fordsville, were the guests of Mr. and Mrs. W. E. Brown Sunday.

The song service given by the different choirs of the town last Sunday evening at the Methodist church was quite a success. The address by Rev. Graves in "What to be learned from the San Francisco disaster" was interesting and very fine.

Very important and vital matters will be laid before the committee, and a full attendance is earnestly requested. Dunt fail to attend.

Very respectfully,

Gus D. Shellman,

Chairman.

Jno. P. Haswell Jr.,

Secretary.

READ THIS.

Milledgeville, Ky., Jan. 1, 1903. Dr. E. W. Hall, St. Louis, Mo. Dear Sir—I have been a great sufferer from kidney disease and was treated by my some physicians with no benefit. Your Texas Wonder has cured me and I am satisfied it saved my life and I can cheerfully recommend it to ladies suffering with kidney and bladder troubles. Respectfully,

Mrs. Eliza Frost.

A TEXAS WONDER

One small bottle of the Texas Wonder, Hall's Great Discovery, cures all kidney and bladder troubles, removes gravel, cures diabetes, emulsion, weak and lame backs, rheumatism and all irregularities of the kidneys and bladder in both men and women, regulates bladder trouble in children. If not sold by your druggist, will be sent by mail on receipt of \$1. One small bottle two months treatment and seldom fails to perfect cure. Dr. E. W. Hall, Sole Manufacturer, P. O. Box 629 St. Louis, Mo. Send for testimonials. Sold by all druggists.

A. E. Smith, cashier, of the Bank of Glendane went over to Union Star Saturday to spend Sunday with his friend Byron Cart.

BUY ROAD MATERIAL.

Hardinsburg, Ky., May 1—The overseers and road hands will be gratified to know that the county has purchased for their use a large quantity of materials for roads.

The purchase was made by the county Judge, the Supervisor and the Road Committee of the Fiscal court. Sealed bids were made by Pete Shoran Bro. & Co., B. F. Beard & Co., G. D. Shellman and Hook, DeHaven & Co.

B. F. Beard & Co. received the contract. In making their estimate they based it upon 150 lbs of dynamite instead of 1500 pounds, but making the amount of dynamite equal in the bids, all the other firms agreed that they had made the lowest bid and were entitled to the order. Before the bids were opened, one agreed that no mistake was to be corrected, but the successful bid will be presented to the Fiscal Court, with recommendation by the committee that the correction be made by it. The firms bidding represented three wholesale houses in St. Louis and Louisville considering the high grade of the materials, this is the cheapest lot of tools etc., purchased by any person other than a merchant. The bill cost the county about 40 less than would have been the case had the materials been purchased by wholesale, and by reason of the fact that they are to be delivered here, it gives the road officials opportunity to procure a receipt for all materials and tools furnished each overseer.

A road grader has been purchased for the use of Hardinsburg Magisterial district. The price paid was \$300.

Destroyed by Fire. Elizabeth, N. J., April 20—The Bayway Refining company's plant at Elizabeth was destroyed with a loss of \$100,000.

"UNCLE" BERRY

MACY DEAD.

Hardinsburg, Ky., May 1.

"Uncle" Berry Macy, who has been ill at his rooms at the Ford Hotel, for several months, died Monday morning at 7 o'clock. The funeral was from the M. E. church South, Tuesday morning and the interment at the family grave yard about four miles from town. The Rev. Gabe S. King conducted the funeral services, and the burial was under the direction of the Masonic fraternity, he having been a member for more than fifty years, of Breckenridge Lodge 67. A more extended notice will appear in next week's issue.

Does Your Heart Beat

Yes, 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Parasitic humors are then absorbed into the blood. Keep the bowels open with Ayer's Pills.
